

Birmingham Science City Innovative Low Carbon Working Group Agenda

Wednesday 6 December, 14:00 – 17:00

[Mott MacDonald](#), 35 Newhall Street, Birmingham, B3 3PU

Time	Item	Lead
13:45	Tea and coffee	
14:00	Welcome and introductions	Mike Woollacott, Greenwatt Technology
14:05	<p>Sustainable construction activity and projects</p> <p>The publication of the WM Science and Innovation Audit earlier this year identified one of the region's market strengths as sustainable construction. Today's hosts, Mott MacDonald along with National Grid are leading on projects related to this theme and this session provides an overview of this activity.</p>	Terry Ellis, Mott MacDonald Alison Fulford, National Grid
14:25	<p>Too green for its own name</p> <p>Orsted is the new name for DONG Energy and the company is leading the way in powering the world using renewable energy sources. The organisation, which has global standing, has recently changed its name from DONG, which stood for Danish Oil and Natural Gas and no longer accurately reflects who the company is or where it wants to be. Learn more about why and how it is embracing the renewable energy agenda and how you can get involved.</p>	Richard Tandy, Ørsted
14:45	<p>Accelerating Thermal Energy Technology Adoption</p> <p>Learn more about the new ATETA project, which focuses on supporting SMEs in renewable thermal energy generation, use and thermal energy storage, as well as all energy system integration. It is also well connected with the Energy Capital and Energy Research Accelerator initiatives.</p>	David Terry, University of Birmingham
14:55	<p>Development and consultation on West Midlands Innovation Alliance</p> <p>This session will provide another opportunity for ILCWG members to hear about the latest progress towards developing a new West Midlands Innovation Alliance and the implications this may have on the ILCWG next year.</p>	Pam Waddell, Birmingham Science City
15:15	<p>New partnerships and funding opportunities</p> <p>An opportunity for all members to let the group know where they may be looking for collaboration opportunities for projects or to find partners to turn an idea into reality. This is also a chance for partners to provide updates on new funding streams that they may be aware of that are of relevance to low carbon innovation. This session will also provide an update on the new ERDF funded Low Carbon Growth Support Project in GBS and Black Country LEPs.</p>	All
16:00	Networking and collaboration building opportunity	
17:00	Close	

Future ILCWG meeting dates to be confirmed.
