

Hydrogen & Fuel Cells into the Mainstream – Powering our Homes, Workplaces and Transport

International Brokerage Event – Tuesday 14th March 2017

The Enterprise Europe Network invites you to participate in an international brokerage event and conference devoted to hydrogen & fuel cells taking place at the National Exhibition Centre (NEC), Birmingham, UK on Tuesday 14th March 2017.

As in previous years, the brokerage event has been designed to complement the conference programme, offering you an exclusive opportunity to meet with strategic partners, as well as potential customers and suppliers.

The brokerage event offers you the opportunity to:

- Promote your technology and expertise to a range of UK and international organisations
- Access the latest technological developments from across Europe and beyond
- Develop partnerships leading to technological and commercial collaboration
- Appreciate developments in the sector and highlight opportunities

The conference programme will present the latest opportunities and innovations in fuel cells and hydrogen with perspectives from key organisations such as ITM Power, BOC and Johnson Matthey.

Building on the success of previous years, this exclusive conference and international partnering platform will once again bring together researchers and industrial players from across Europe to share knowledge and forge relations in this increasingly commercial sector.

Key Offer:

- **FREE registration** to the conference for international delegates and Midlands (UK) based clients who register and participate in the brokerage event (currently £250) * **Please note that a minimum of 4 meetings must be selected**
- **FREE one night accommodation for international delegates** travelling to UK from overseas (Limited availability!)
- **Reduced rates and discount** available for stands and exhibition space

For further information and to register to this brokerage event please visit:
