Aimed at the built environment professional designing refurbishing or running domestic and non-domestic properties, this free-to-attend event combines a comprehensive conference programme, featuring expert speakers from across industry and academia, and an extensive exhibition of the latest technologies and materials to achieve a sustainable built environment.

Between 3,500 to 4,000 built environment professionals, at the forefront of sustainable design, retrofit and building management visit the show. They are responsible for these building types:

- volume housing – councils and housing associations/developers (not home owners)
- hotels
- leisure
- schools
- retail
- hospitals
- offices
- Businesses

With rising energy bills for businesses, the social housing sector and new legislation on the horizon for commercial landlords, we're looking at energy efficiency in more detail this year with dedicated sessions on smart buildings, innovative solutions and the most effective retrofitting options.

We've also got a focus on fabric first dealing with new build methods and materials, a wider look at sustainable cities, the future for ECO, Green Deal and the code for sustainable homes/buildings and the reality of zero or low carbon cities, just to name a few.

The full programme can be found by [clicking here](#), there's over a 100 sessions, including workshops, CPD seminars and debates.

New for 2014 is the chance to meet with the judges and find out about the criteria for the Greenbuild Awards to see if your projects would qualify. A drop in design and advice clinic from the judges who include, **Liz Reason (Green Gauge Trust)**, **Kerry Mashford (NEF)**, **Paul Ruysssevelt (UCL)** and **Rob Pannell (Zero Carbon Hub)**, where you can make the most of their extensive knowledge of what works and what doesn't when it comes to sustainable efficient property refurb and new build.

There's loads more to find out at **Greenbuild Expo** this year, it's where 1000's of professionals who are **serious about sustainability** network, share knowledge and their experiences as well as learn about the latest legislation, products and methods available to them for creating better buildings.

If you'd like to know more about the event in general please call Chris Eldridge on 07921 677645 or visit [www.greenbuildexpo.co.uk](http://www.greenbuildexpo.co.uk)
